SUMMARY

I love building clean, user-focused web applications from the ground up. I'm passionate about turning ideas into interactive, responsive interfaces. I'm eager to work in a team where I can grow, contribute, and solve real-world problems through code.

SKILLS

Frontend: React.js, JavaScript(ES6), Tailwind CSS, Context API, TanStack Query

Backend: Node.js, Express.js, EJS, RESTful APIs, JWT, Firebase Auth, MongoDB

Tools & Platforms: Git, GitHub, Postman, Axios, Stripe, MVC Architecture, Vercel, Lottie React

PROJECTS

Micro Tasking & Earning Platform

[Live](#) | [Client](#) | [Server](#)

A role-based task platform where buyers post tasks and workers earn by completing them.

Features:

- Implemented role-based access(Buyer, Worker, Admin) with secure JWT and Firebase Auth
- Integrated coin-based task posting with Stripe and real-time coin deduction.
- Built dynamic dashboards with task requests, ImgBB uploads, and status tracking.

Technologies: React, Tailwind, Context API, TanStack, Axios, Express, MongoDB, Firebase, JWT, Stripe, ImgBB

Bistro Boss Restaurant

[Live](#) | [Client](#)

Modern restaurant app with menu control, and user roles, and secure ordering.

Features:

- Firebase Auth(Email, Social Login) with protected routes.
- Admin-only menu & user management with Stripe payment integration
- Responsive UI with tab navigation, Swiper carousel, and SweetAlert2

Technologies: React, Tailwind, TanStack Query, Context API, Firebase, JWT, Axios, Swiper, Vercel

CSV Automation Tool

[Live](#) | [Server](#)

A server-rendered tool to upload, display, and delete CSV files using MSV architecture.

Features:

- Upload and parse CSV files via Express
- Render uploaded data dynamically with EJS
- Clean deletion and management of file entries

Technologies: Node.js Express.js, Multer, MCV Pattern, File System(fs), EJS

EDUCATION

Bachelor of Social Science in Political Science

National University of Bangladesh

Aug 2021- 2026(Ongoing)

LANGUAGES

Bangla (Native) | English (Conversational)
